

Falcon Specs v1.4 — Organization Hierarchy Visual Repair

Date: 2026-05-15 (Round 5 night shift) **Owner:** Adnan Orchestrator (Brain SK Night Shift Round 5) **Scope:** Organization Hierarchy tabs → CommChannels & Services — final live-bundle verification + Save/Cancel deep-dive **Round:** 5 of max 5 **Project:** falcon-web-platform-ui — Admin Console + falcon-ui-core library

Round 5 Headline

- **Fresh bundle confirmed live** — Round 4 `<falcon-angular-alert-dialog>` chunk hydrated on Ammar PC Chrome.
- **57-case SoT matrix run vs live bundle:** 40 PASS · 2 FAIL · 3 PARTIAL · 12 NOT-VERIFIED.
- **Round 4 STILL-BROKEN trio resolution:**
 - Defect 1 (table chrome) → **FIXED at runtime:** header bg `rgb(245,245,245)` = #F5F5F5 (SoT match)
 - Defect 2 (inline edit-row) → **FIXED on first-edit case:** flat stripe `rgb(243,248,245)` = #F3F8F5, no bubble, no notch, inline between rows
 - Defect 3 (IB modal) → **REGRESSED:** Wave-15 in-flight refactor introduced **DEFECT-CCS-R5-002** (modal mounts 0×0, invisible)
- **Save/Cancel deep-dive** (see `audit/SAVE_CANCEL_AUDIT.md`):
 - All 4 editable surfaces on Org Hierarchy page audit as **LOCAL-STATE-ONLY** today
 - Zero network calls for Save / Cancel / Visibility toggle
 - Cancel works cleanly (no leaks)
 - Wave-15 introduces backend wiring CAPABILITY but it's not active on this page (no `nodeId+accountId` inputs passed)
- **2 NEW defects:**
 - **DEFECT-CCS-R5-001 (P2)** — edit-row above-thead position on 2nd+ open
 - **DEFECT-CCS-R5-002 (P1)** — IB modal 0×0 dimensions
- **Wave-15 in-flight refactor discovered:** separate agent modified working tree mid-R5 with partial migration of IB-modal flow to real backend services. NOT staged. Working tree builds GREEN. User must decide: continue / stash / revert.
- **Build at end of R5:** GREEN (hash `8d2ea4c8c3255942` , 16.4s on `nx build admin-console --skip-nx-cache`).
- **Files staged:** 21 total (R3+R4 work, untouched in R5). Unstaged: ~13 files (Wave-15).
- **Commit:** NONE — user will commit + push if they choose.
- **Push:** NONE.

See `ROUND_5_REPORT.md` for full track-by-track narrative. See `audit/SAVE_CANCEL_AUDIT.md` for the per-surface wiring audit.

Final compact verdict table

Metric	Value
Fresh bundle confirmed	YES — <code>falcon-ui-alert-dialog-tw.js</code> chunk served 200 by remote on :4204; <code><falcon-angular-alert-dialog></code> hydrated in DOM
57-case matrix verdict	40 PASS · 2 FAIL · 3 PARTIAL · 12 NOT-VERIFIED
Round 4 STILL-BROKEN trio	Defect 1 FIXED · Defect 2 FIXED (1st-open) · Defect 3 REGRESSED (Wave-15)
Round 4 NOT-VERIFIED (19)	7 → PASS, 12 → still NOT-VERIFIED (most gated by DEFECT-CCS-R5-002)
DEFECT-CCS-R2-001 status	RESIDUAL — manifests as DEFECT-CCS-R5-001 on second/subsequent edit-row open
Save audit S1 (2-field edit-row)	LOCAL-STATE-ONLY · no network · persistence lost on reload
Save audit S2 (1-field edit-row)	LOCAL-STATE-ONLY · no network · persistence lost on reload
Save audit S3 (visibility toggle)	LOCAL-STATE-ONLY · immediate apply
Save audit S4 (IB dialog)	WIRED-TO-BACKEND in Wave-15 source · MOCK fallback on this page · currently INVISIBLE due to R5-002
Cancel audit S1 / S2	CANCEL-WORKS · zero changes leaked · no network

Metric	Value
Multi-lane edit	Single-lane replace by design · matches SoT
SoT-vs-dest Save/Cancel semantic delta	NONE on local-state level
Components rendered	14 / 14 verified hydrated; only <code><falcon-dialog-tw></code> has 0×0 sizing defect
New R5 defects	DEFECT-CCS-R5-001 (P2 position regression), DEFECT-CCS-R5-002 (P1 IB-modal invisible)
P0/P1 fixes applied in R5	ZERO — fixes deferred to user decision on Wave-15
Build green	YES — <code>nx build admin-console :hash 8d2ea4c8c3255942</code> , 16.4s
Comm-channels-tab parity (evidence-backed)	94 %
Files staged total	21 (unchanged from R4)
Commit hash	NONE
Push status	NONE
Bypass markers	NONE
PDF version	v1.4
Brain SK mirror confirmed	YES

Round 4 Addendum (retained for chronology)

- **New Falcon library component shipped:** `<falcon-alert-dialog>` + `<falcon-alert-dialog-tw>` + `<falcon-angular-alert-dialog>` — Shadow + Light DOM Stencil components + Angular wrapper + 6-file knowledge dossier.
- **Build (R4):** `nx build admin-console` GREEN — hash `12abe61de49a8543` , 16.2 s.
- **R4 dev-serve diagnostic:** stale bundle issue resolved in R5 (user restarted dev-serve before R5 ran).
- **SoT matrix harvested in R4:** 57 test cases at `matrix/sot-testcases.md` .
- **R4 matrix runtime results:** 28 PASS / 7 FAIL / 3 PARTIAL / 19 NOT VERIFIED.
- **Logged R4 defect:** DEFECT-CCS-R4-001 (P2, intentional) — footer bg deliberate divergence; retained in R5.

Round 2 Addendum (retained)

Date: 2026-05-15 (Round 2 night shift) **Scope:** comm-channels-tab title + Action header copy
